

# **Architecture 2017-2018**

Majors must pass all required courses, all approved electives, ENGL 2000 and MATH 1022 with a grade of "C-" or better. A student who earns less than a "C-" in one of these courses must repeat the course in the next regular semester in which the student is enrolled and the course is offered.

In the architecture curriculum, normal course progress is imperative. A student failing to complete any required course more than one year later than the time designated in the curriculum is prohibited from advancement in the design studio sequence until the deficiency is corrected. All required courses listed through the senior year must be completed before a student is allowed to enroll in the designated fifth-year courses. Courses listed below are to be scheduled in the sequence in which they are listed.
