

## **SCROLL SAW**

- 1. Configuration: a short thin blade held through the table by a long arm**
- 2. Cutting Action: the blade reciprocates up and down, cutting on the down stroke**
- 3. Adjustments**
  - a. The table tilts for bevel cuts**
  - b. The blade can be easily removed and inserted through a hole in the wood to allow trapped cuts**
- 4. Cuts: intricate and delicate curves in flat, thin wood**
- 5. Safety:**
  - a. Watch your fingers**
  - b. Make sure blade has teeth pointing down**
  - c. Make sure tension is adjusted properly on the blade**
  - d. Do not push too hard on wood. You want only enough pressure to maintain good contact on the down stroke, not the up stroke.**
